

Step 1: Setup VPN Connection on PC with Windows 2000:

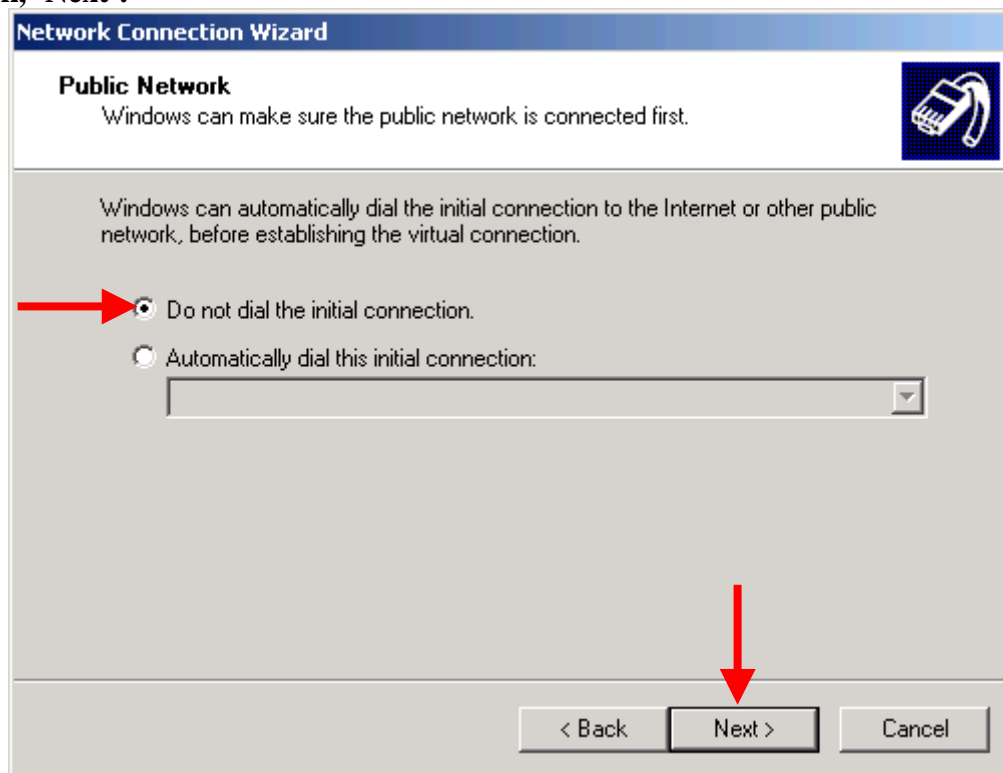

Click, 'Start', "Setting", "Network and Dial-up Connections", and "Make New Connection".

Click, 'Connect to a private network through the Internet' and click 'Next'.

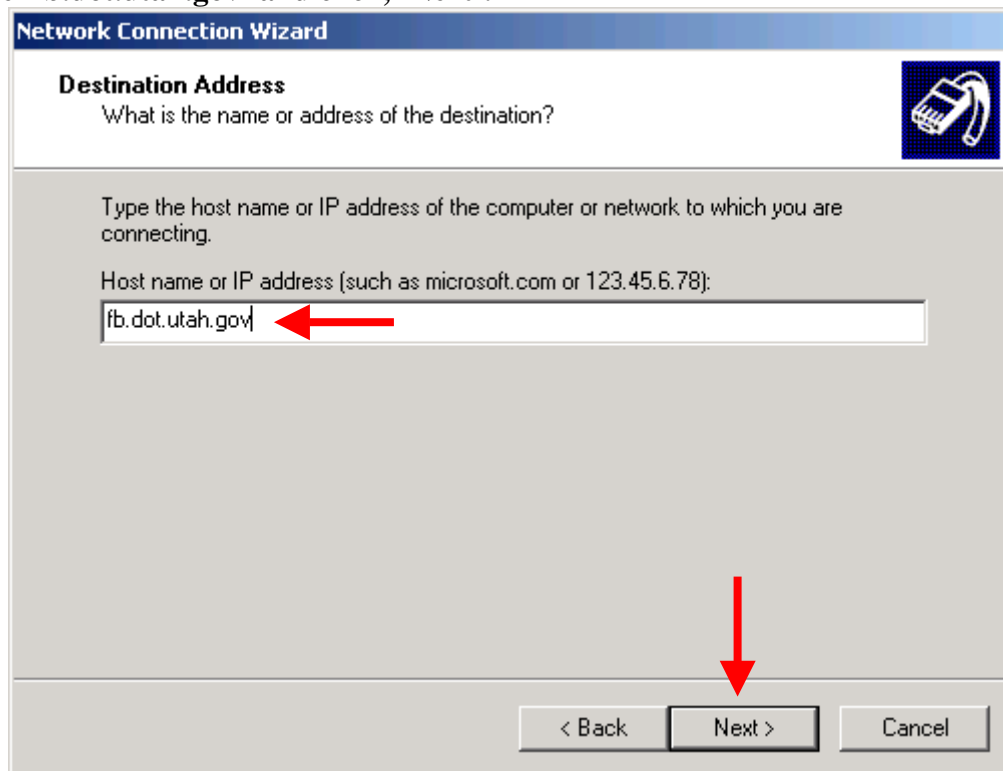

Click, 'Next'.

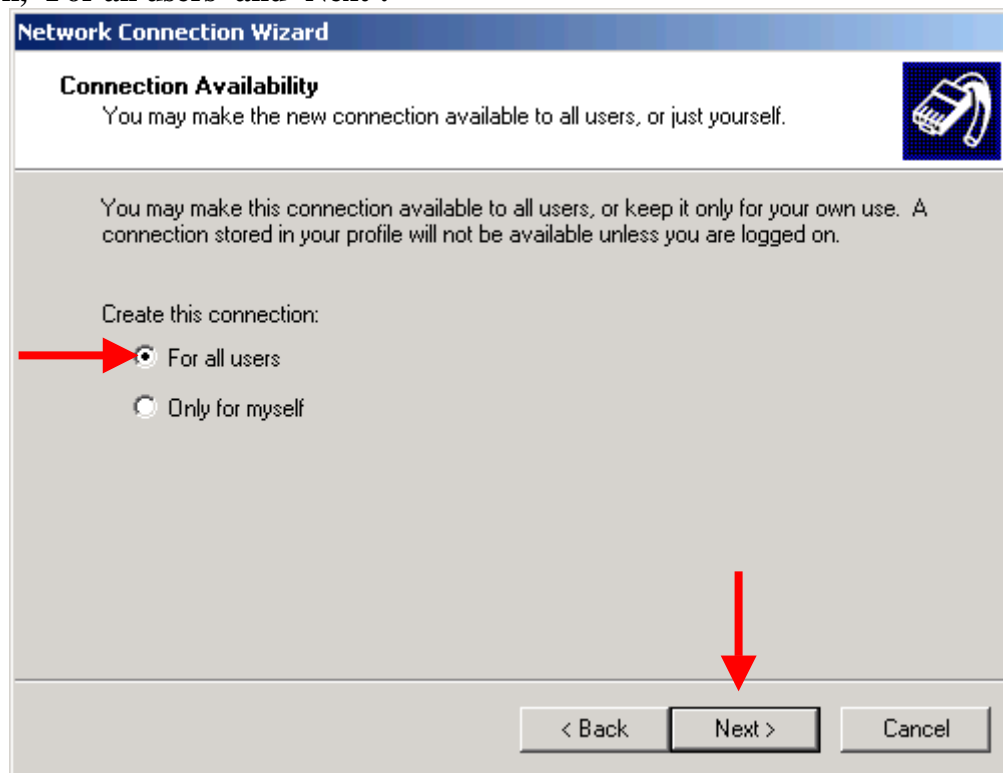

The screenshot shows the 'Public Network' step of the Network Connection Wizard. The title bar reads 'Network Connection Wizard'. Below the title bar, the section is titled 'Public Network' with a subtext: 'Windows can make sure the public network is connected first.' To the right is an icon of a network card. The main area contains the text: 'Windows can automatically dial the initial connection to the Internet or other public network, before establishing the virtual connection.' There are two radio button options: 'Do not dial the initial connection.' (which is selected and pointed to by a red arrow) and 'Automatically dial this initial connection:' (which is unselected). Below the second option is an empty text box. At the bottom right, there are three buttons: '< Back', 'Next >' (pointed to by a red arrow), and 'Cancel'.

Type 'fb.dot.utah.gov' and click, 'Next'.

The screenshot shows the 'Destination Address' step of the Network Connection Wizard. The title bar reads 'Network Connection Wizard'. Below the title bar, the section is titled 'Destination Address' with a subtext: 'What is the name or address of the destination?' To the right is an icon of a network card. The main area contains the text: 'Type the host name or IP address of the computer or network to which you are connecting.' Below this is a label: 'Host name or IP address (such as microsoft.com or 123.45.6.78):'. Underneath the label is a text box containing 'fb.dot.utah.gov' (pointed to by a red arrow). At the bottom right, there are three buttons: '< Back', 'Next >' (pointed to by a red arrow), and 'Cancel'.

Click, 'For all users' and 'Next'.

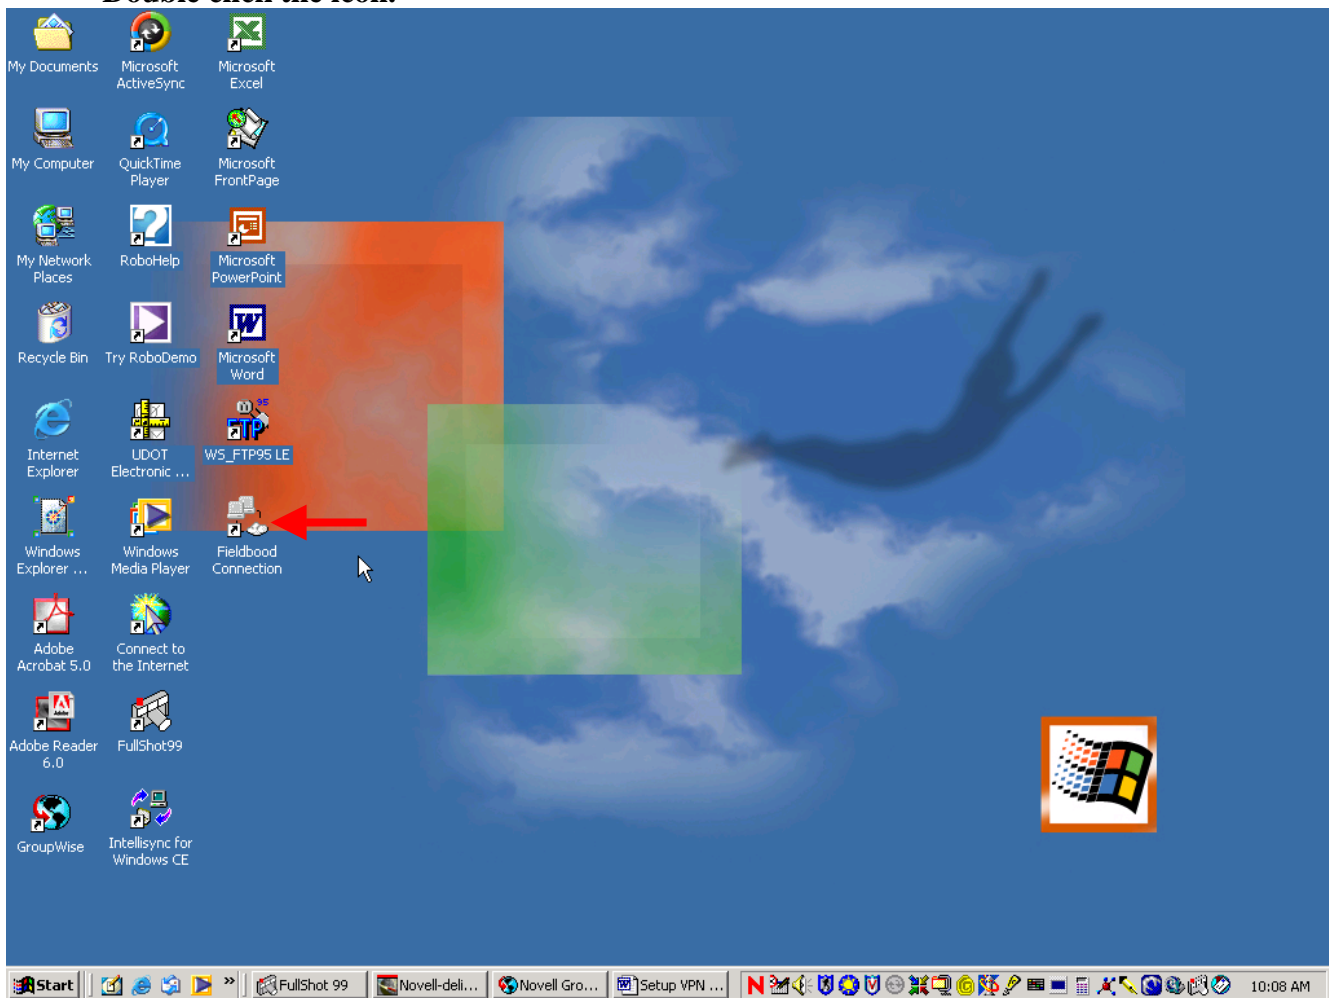

Type, 'Fieldbook Connection', and click, 'Finish'.

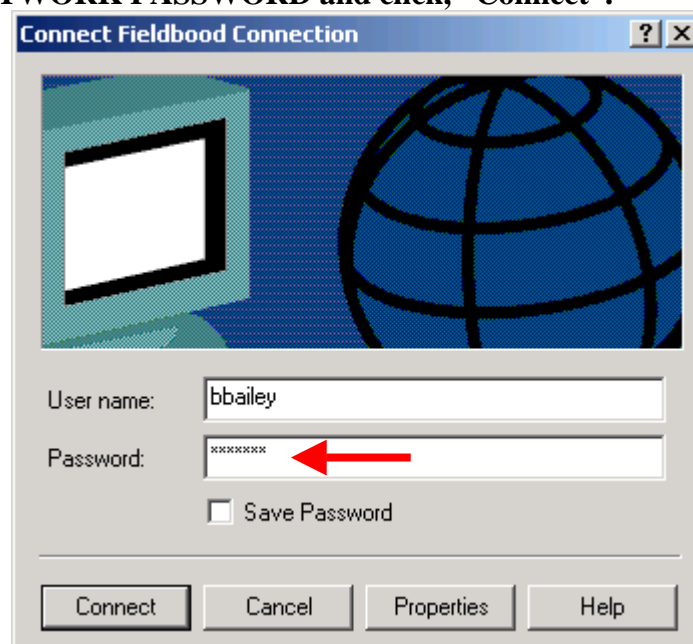

Step 2: Establishing a Field Book Connection:

After completing Step 1 the “Field Connection” icon will appear on your desktop.

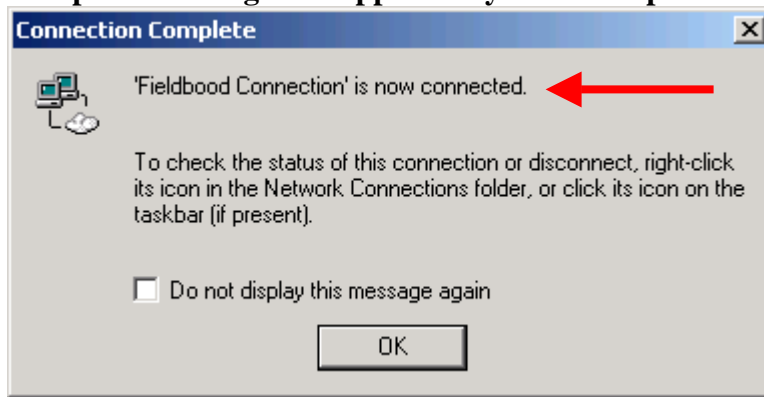

Double click the icon.

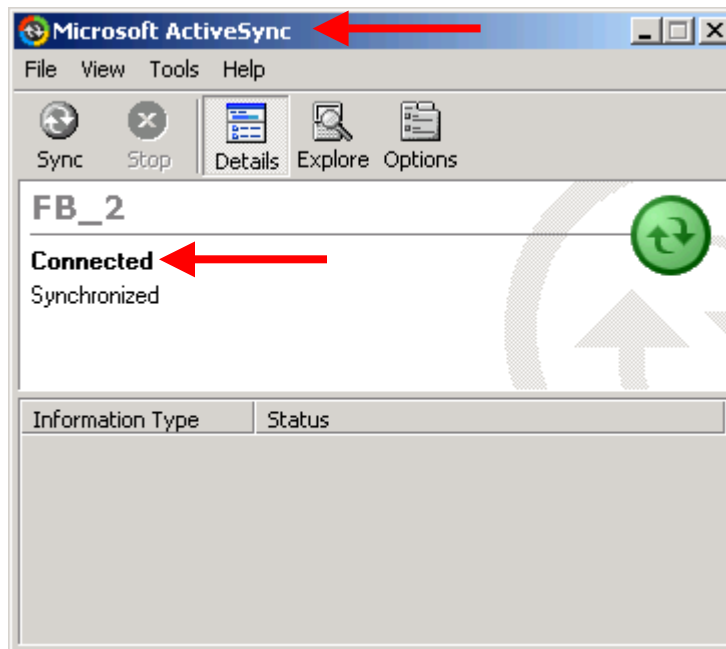

Enter your NETWORK PASSWORD and click, “Connect”.

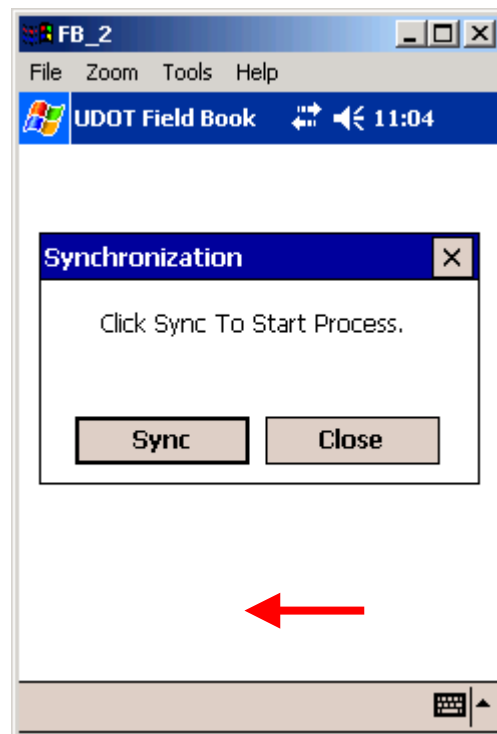

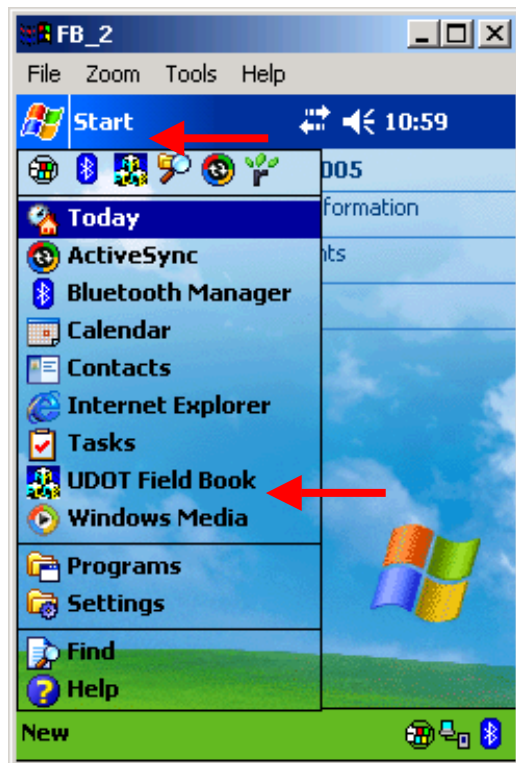

“Connection Complete” message will appear on your desktop.

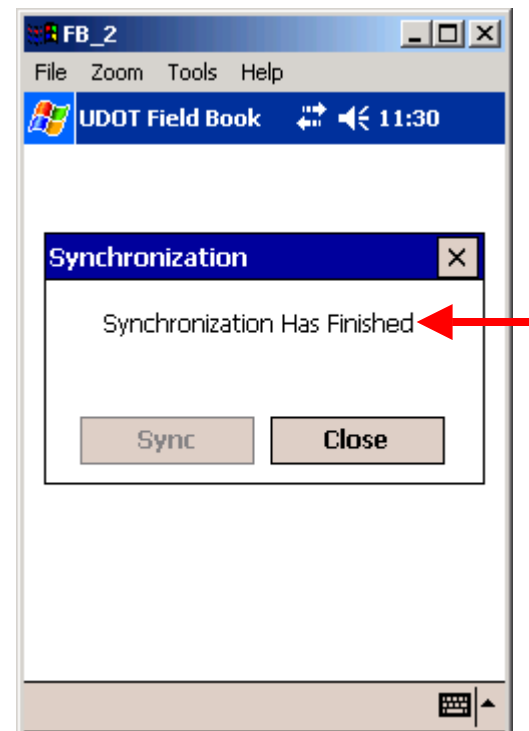

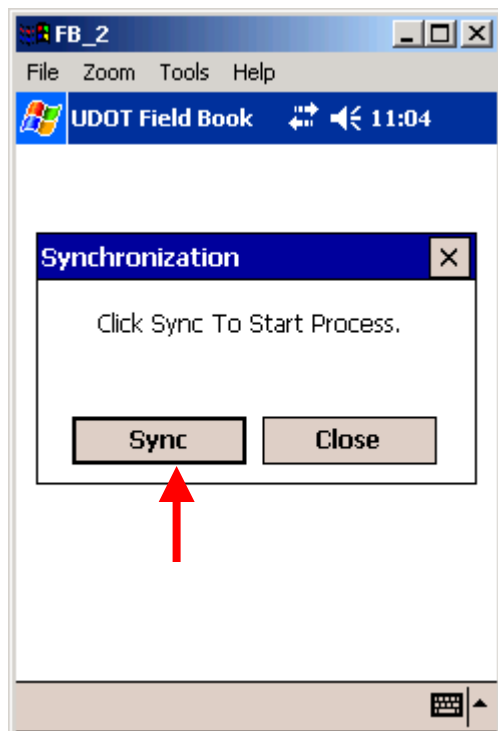

Place your iPaq in the cradle and run ActiveSync. NOTE: ActiveSync should start as soon as you place your iPaq in the cradle.

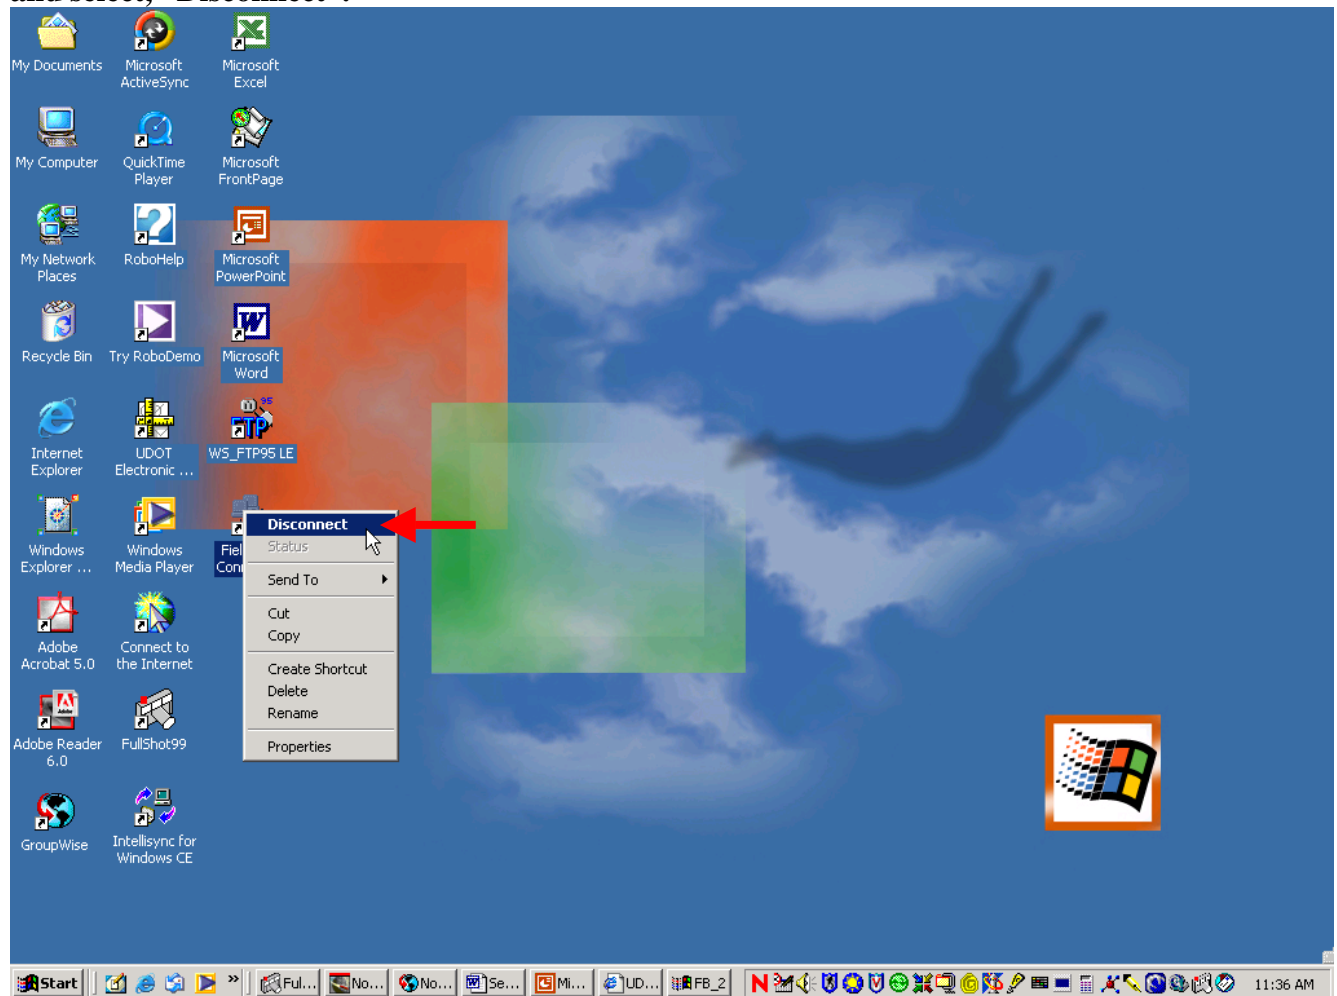

On the iPaq, click “Start”, “UDOT Field Book”, “Menu” and Synchronize.

Click “Sync” and wait synchronization to FINISH.

To disconnect the network connection, right mouse click the “Fieldbook Connection” icon and select, “Disconnect”.
